25X1

1. A new section of the international telegraph line has been constructed between Bucharest and Focsani, replacing the old line that ran between Bucharest and Cernauti. This new line avoids crowded areas, bridges and important highway and railroad junction points. It was constructed as a secret project.
2. Approximately two hundred and fifty armed guards who are under the direct control of the State Security, patrol the line night and day. A portion of this guard force uses motor vehicles. Salaries of the guards are 12,000 to 18,000 lei monthly and they are issued special rations.
